Art Unit: 3727

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 - 24 are finally finally rejected under 35 U.S.C. 103(a) as being unpatentable over Adell.

The container dimensions, material of construction, and number of containers fittable within a box are obvious matters of choice with the device of Adell. To have employed injection blow molding in the construction of the device of Adell would have been obvious to one of ordinary skill in the art in view of the wide acceptance of such in the plastic container field. The method claimed would have been an obvious method for the above set forth device in view of the intended use. Applicant's arguments have been considered, but do not convince the Examiner of error.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3727
